

FUNCTIONALITY AT ITS BEST

Architectural space is the model for this innovative, multiple award-winning, radiator concept – the Vasco Beams. Beam-shaped volumes together form a robust whole, in beautiful balance with the geometric architecture in the living space. The structural accessories offer the possibility to lay the desired accents yourself. Two water channels per element ensure high output and, as a bonus, optimal energy efficiency. In 2014, the Vasco Beams won the renowned Reddot Design Award.
